case outsourcing portugal.

CALx Project

solution

Design and management of a migration process from COBOL and AS400 to JAVA technology, with the objective of developing a new internal banking system, according to the client's needs. We are talking about an integrated project in the banking sector in Portugal and France. Since the beginning we allocated 19 FTE (English and French speaking) exclusively for this project.

tech stack

| COBOL | AS 400 | SQL | JAVA |

| Adelia Studio | VBA | .NET | Jira |

team diversity

Cobol Developers (x3), AS400 Developers (x4), Java Developers (x5), Software Testers (x3), .NET Developers (x4)

randstad

"*Ausy by Randstad has demonstrated to be very reliable business partner in terms of responsiveness to our requests. Timelines are clearly met. Candidates are shared according to the defined timelines. CV's also present the required and expected quality in terms of profile requirements. The communication between Ausy by Randstad and the business teams is also very fluid and regular which is a plus and a success factor for the points previously mentioned.*

The pricing is also adjusted to the business requirements and we have registered flexibility from Ausy's side which is a valued point.

Besides this being a very recent partnership, until now Ausy by Randstad has met the quality standards we expect from a business partner and we look forward to continue to collaborate and grow on this positive track."
